I sit here and pontificate (think), question, and try to understand the stupidity of economics and money! It seems that money is an "educational" trait of a modernized western world. If you go to school and learn our shit, and apply our shit to others, you can give as much shit as you want to others and take no shit for yourself, the result in giving out shit is to take all of the money. Ah economics at its best; and shit in shit out the perfect computer algorithm of total shit; And If I gave you a Euro and you had one Euro yourself you would have two Euros' (simple shit to work out, that is the educational philosophy of modern day schooling). So where does one plus one come in to this shit?

From a child's earliest age (4) and above they are force fed with  $1+1 = \text{money} = \text{shit}$ . At no time, and I mean at no time is a child, a teenager, a young adult, a graduate, or PhD informed and or told of the power of more than one. Now what sort of shit is that to teach a child other than the con and clone the next generation of mindless drones that do all they can for nothing?

Welcome to my school..

To each and every child, teenager, young adult and PhD holder:

"Forget all that shit you've be forced fed for all of your years, it is the falsity of economic schooling. It is time to learn, and learn for yourself all that there is in the universe, (well some of it anyway). On your desk is TWO MAGNETS, they will be your new BIBLE from now until the end of time (which is just around the corner). The two magnets are stuck together and form one magnet of two magnets,

Child thinks: One magnet (North and South), and two magnets (North and South), and the North has gone South all by itself, (now that some cool shit right there).

Give the child FIVE magnets and do the same. Five of one and one of five, is it the same? Weird shit right there. Give the child a piece of paper and ask them to measure the distance between north to north and south to south; and to discover that north to north and south to south is not 50/50% as was taught. Lying shits those teachers! Taking a closer look North is equal to 2/5th of itself and the South is equal to 3/5 of itself or one fifth of the shit is for free!

Child goes home after day one. "Mum / Dad" I taught myself some cool shit today, one 1/5th of everything is for free, so what are we paying 20% TAX (the one fifth for free)? Mum and Dad to child, 1/5th is the government who run the schools and force feed you one+one is shit. But the cool shit you taught yourself is worth more than the cost of gold, and that my dear child is priceless.

Child day two at school:

Magnets stick together or push apart no magic shit there, just a universal fact, no more than that. A magnet's has a plane of polarization (invisible to the eye, (just like God as written in the book of economics also known as the King James the V Bible)). If two magnets push apart but are forced close together where does the inertia plane go? (Teachers take note sub-lesson two, Ask the question and keep your mouth shut).

Child thinks; If two are pushing in the same but opposite direction where does the middle bit go? It cannot go back to itself as it is pushed by itself and cannot go forward as it is being pushed back by the force coming forward so it must go sideways! If it goes sideways then it changes the plane of polarization against all of the academic teaching know to date.. Now there is some real cool shit I just taught myself!

Child goes home, "Mum / Dad if you push something towards something with the same amount of push, the resultant product output it contrary to the laws of motion as laid down by the postulate of Mr. Issac Newton, it also means that if the right push is applied in the right way to the wrong push you get a double push against itself or more free shit".

Mum / Dad to child, "Ah the apple fell upon his head and they he called it gravity, he knew no better at the time and wrote it in a book and gave it to others to teach, so they have been teaching you shit for more than 300 years"!

Child day three: Two magnet's in a compressional state force the inertia plane to go the wrong way, or two compressed magnets create a synthetic inertia plane. (SIP), If you take 4 SIPS' and push them together what happens? (Teachers take note sub-lesson three, Ask the question and keep your mouth shut).

Child thinks, One magnet does shit, two magnets do clever shit, North moves South by itself (magical shit), 50/50% is a shitty lie, and 1/5th of free shit is cool shit, flipping the inertia plane is amazing shit, so to compress the SIP with a SIP is to amplify the SIP and that shit is out of this world. Child writes (If  $N=2/5$  [AND]  $S=3/5$  [THEN]  $S > < S = 6/5$  of itself [OR] 1 and 1/5 (for free)): If  $S > < S = \text{SIP}$  [AND]  $\text{SIP} > < \text{SIP}^2 = \text{Free SHIT for ever!}$  Child thinks.....

If  $E=mc^2$  is (work shit) then  $\text{SIP} > < \text{SIP}$  is free shit, therefore, ALL of the SHIT it equal to  $E=mc+/-1$  where the resultant part thereof of "the" Shit is that shit is free and always has been, its just governments and teachers applying economic shit to make everybody believe the false shit in this shitty world. If we all do the right shit, that of  $E=mc+/-1$ , then all of the shit would be for free; free for you, free for them and free for me.

Result: Child thinks (NO TEACHER), I can still do what I need to do, but I'll not call it work, I can still eat, party and have fun, but no one needs "the economic falsity of shitty money", SIP is here, it is today and will be our future, We the children of this shitty world will have to run this world in the not to distant future, so do I want the false shit, or do I want the real shit, and me I want the real shit and I want it for free from now until the end of eternity.

The ancient Babylonian money magik is still casting it's illusion of us. It's time we see past this shit and enjoï some free shit.

I don't have space or time to "chit-chat" here on the why's and the wherefore's of Kinetic power transfer, but KLM is built and sits on my desk, it produces 56Kw of power and weighs in at 81grams!!! It replaces the combustion engine. So oil's gone along the the combustion engine, and the \$\$\$, and the banks (bit-coin), next there is food (for all), I also hold a patent on fast crop production and produce size, (believe me the results are out of this world). That means everybody gets free food, free transport, free energy. As I said.. The only shit you pay for is bad shit, and the good shit's for free. So what do you want to do?..... Be part of the problem or part of the solution, and how many takers (any age / race / color / creed / or sex) want to enroll in the school of SHIT

SIP(3) EM energy is universal and infinitive within its power. Two (or more) magnets under compression recreates a stored and sustained kinetic force. (child's play (school of shit page 14)) any kinetic source can be moved from on state to another, (from one SIP to another). If the two SIPS are used against each-other .. MOTION is the resultant product. KLM (Kinetic Linear Motor).

4 ans ...

SIP (2) compressed EM forms an energy similar to laser. All a laser is coherent RF (light), all a SIP is coherent EM. One you see one you don't but it there. All (and I mean ALL) matter

...ation... stop imagining in our heads about things that may or may not be, and it could be in the future... EMG - SIP - SIP (communications) and SIP power transfer are here today. The only reason YOU DO NOT have access to that technology is the "wankers" at the top want to continue to pollute the planet with Oil and Oil drives the \$\$\$ without the \$\$\$ oil is nothing but a black repugnant goo .....

But why stop there? If RF is not on EM and EM is "universal" and omni-directional it now mean two way communications "anywhere", by using a secondary SIP it is possible to force the EM and make it uni-direction... EM energy is travels very fast, (an I am not wasting my time on the falsity of the speed of light) Therefore SIP communications replaces RF communications and reduces the global radiation hazard from common microwave energy. (Micro-wave Energy) Would you stick you head in a microwave? So why do you put a cellphone next to your head? or Why to you place a sterilizing device in your pocket / trousers!

To all: (1). Gravity, is (for want of a number) 9.8:1 Therefore if you are TWO GEARS who's ratio is 9.8:1 and the (1) is a goggle wheel connected to a fixed platform and the (9.8) is fixed to a linear state, applying a downward for to (1) rotates (9.8) the other direction .. So down become up!. (Oh I do that one 35 years ago!) Gravity is a "nothing" ~ a cover-up - and a con. The cool shit is SIP, (Synthetic Inertia Plane) - (This box is not big enough to to write it all). Take two magnets (NS><SN) and force them together and the inertia place (--NS--) is synthetically moved from -- -- to | and you end up with a "right-angle" in the inertia plane (--NS>|<SN--). Now that you have "move" the inertia plane off the EM axis, it now reside on the RF axis. RF is communications (paid for), but now all RF can be moved to the EM for FREE. EM encompasses the world, therefore it is possible to replace all antenna's globally with just to localized magnets and you get more free SHIT, that is by directional communication on the earths ground-wave for free.

Steve Dufourny Steve, I like your comment, and I welcome your input. Cosmology is not the name of the game; Mankind must first understand himself before he tries to understand another. Learn the power of one and one plus one, then work out the rest. This simple drawing is only an example of the power of  $1+1>2$ ; it just takes mankind to understand what they are seeing. I care not for academics who "think" they know more, as all of their knowledge is just a collection of thoughts of those who have gone before, and they forbid the right of man to think for themselves, develop new ideas and tools to m]progress mankind. when the academics learn that thy are not the be all and end all, then we will all move forward.
